

ATG solution for oil depot

Windbell's automatic tank gauge can accurately monitor fuel storage tanks status of oil depot in real time, and mainly include SP series magnetostrictive probe, SS series console, SM controller and other optional devices.

With the tank gauge, whatever and wherever you want of product level, water level, five-point temperature, inventory, delivery and sales information, Windbell will always here to help you easily reach the target!

◆ SS600 tank gauge console

SS600 tank gauge console is the latest smart console for oil depot, which have 8" colorful touch

screen. With the console you can watch the detail information of oil storage tanks, like product level, water level, temperature, etc. It is also the communication display platform between ATGs and users and has open communication protocol to fuel management system. Configurations like alarm value, tank information, etc, also can be user-defined.

◆ Flexible probe

The magnetostrictive flexible probe use the magnetostrictive measurement technology to report inventory levels in storage tanks. It

can satisfy the demand for a digital communication interface that offers the liquid level market unsurpassed flexibility to meet most process application conditions. The probe provide 3-in-1 measurement for liquid level, interface level and temperature measurements. And there is no scheduled maintenance or recalibration needed once the sensor is installed and calibrated.

◆ Sound-light alarm

An alarming device that sends a warning signal to people through sound and light.

◆ PC remote

The PC Remote Software can provide real-time tank level monitoring on computer at site office.

◆ RS II software

RS II software is installed in a server, based on internet connection between sites and head office,

server in head office can receive tank information transferred from console, and store every record for future inquiry.

◆ **GAS client software**

GAS Client Software is designed to help user monitor tanks in everywhere. When you travel or at home, it is easy to see the current condition of each tanks, if you have a computer or notebook which pre-installed with GAS client software can connect to network.

◆ **GSM modem**

Base on tank gauge console, add one 4G GSM modem, then console can send tank data in format of message to specified receivers.

◆ **Built-in printer**

Base on tank gauge console, add one printer, then different kinds of reports can be printed.

➤ **Product solution**

Name	Model	Quantity	Remark
Tank gauge console	SS600	1	
Flexible probe	KYDM	1	
PC remote	PCR200	1	Optional
RS II software	RS II	1	Optional
GAS client software		1	
Sound-light alarm	BBJ-Z/RE	1	Optional
Built-in printer	SP-RMD6A	1	Optional
GSM modem	4G	1	Optional
